DETAILED ACTION

Applicant's amendment dated 03/18/2004 has been received and entered. By the amendment, claims 1, 4 and 15-19 are now pending in the application. It should be noted that claims 12-13 should be cancelled because of its dependency.

Applicant's arguments with respect to claims 1 and 16-17 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 8-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 8, it is confusing and unclear what is "a gap exists between the LCD and the inner surface of the LCD housing". According based claim 1, the LCD is couple directly to the LCD housing (emphasis added); thus, claim 8 is not further limit claim 1. Correction to the language is suggested to clarify the claimed subject matter.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application

Art Unit: 2871

by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1, 4-5, 8 and 15-19 are rejected under 35 U.S.C. 102(e) as being anticipated by Malhi, US Patent No. 5,844,773.

The above claims are anticipated by Malhi's figure 4 and accompany text which disclose a computer display device comprising:

- . an LCD housing including a case (22) and a light guide (80) made in a single piece from a single light transmissive material such as an acrylic polyurethane material (see col. 3, ln. 21 and col. 4, ln. 21), wherein the LCD housing functions as a light pipe for conducting light through the light guide;

- . a light source (85);

- . an LCD (50) having a back surface coupled directly to the LCD housing and enclosed by the LCD housing (see figure 4);

- . a reflective layer as claimed (col. 4, ln. 23).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2871

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 6-7 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Malhi, US Patent No. 5,844,773, in view Habing et al., US Patent No. 5,661,578.

Regarding claims 6-7 and 9, although Malhi does not explicitly disclose the light source is a cold cathode fluorescent lamp, it would have been obvious to one skilled in the art to use a cold cathode fluorescent lamp as a light source as shown in Habing et al. (col. 5, lines 27-34) since it is a common practice in the art to provide light to illuminate an LCD panel in a particular design.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the

Art Unit: 2871

advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
